

LORENZO COCCHIA

Product-minded Software Engineer / Engineering, product ownership, user research & AI

Munich, DE | cocchialorenzo@gmail.com | linkedin.com/in/lorenzo-cocchia

SUMMARY

Senior Software Consultant in Munich who builds software people actually want to use. I sit between code and product: I talk to users, decide what matters, and then build it myself as a full-stack engineer, from the React screen down to the AWS cloud. PSPO-certified Product Owner with hands-on UX research and AI product experience.

EXPERIENCE

Senior Software Consultant | TNG Technology Consulting, Munich, DE Jul 2025 – Present

- Secured the first paying customer and €10k+ ARR for TAIA, TNG's AI assistant built for external sale, by owning product strategy, roadmap and prioritization as its Product Owner/Manager, reporting directly to partners and leading customer pitches
- Refocused TAIA on non-technical users by planning and running usability tests with 8 users (UEQ benchmarks) plus interviews and focus groups, bringing developers into every session
- Cut backend aggregation latency by 30% on an Order History feature critical to a €20M+ contract by building it end-to-end (React, Apollo GraphQL, Spring Boot 3, PostgreSQL) and iterating with UX and product management
- Enabled commercialization of a €5M+ nuclear-safety engagement by taking a safety-critical radiation monitoring application from client requirements to implementation in .NET/C# with AI-assisted engineering (Claude Code), recording architecture decisions as ADRs

Software Consultant | TNG Technology Consulting, Munich, DE Nov 2022 – Jul 2025

- Saved the client significant build cost on a B2G initiative targeting €10M+ yearly revenue by leading user-centric discovery and Figma prototyping as Product Owner with a Board Member, which led management to stop the project mid-implementation
- Served 80K+ monthly orders across about 15 countries by building RESTful microservices from scratch (1M+ monthly requests) and maintaining legacy services (Spring Boot, AWS, Terraform, GitLab CI, Cypress)
- Prototyped a new orders-by-demand business model end-to-end, from Figma design to a React UI and a Spring Boot 3 service (GraphQL, REST, RDS) on Terraform-provisioned AWS (ECS, ECR, ELB, CodePipeline)
- Upskilled 15%+ of TNG's engineers and consultants as an internal trainer (4 REST API and 2 presentation skills workshops), and ran client workshops on AI tools for developer efficiency

UX Research Intern | ZAUBAR, Berlin, DE Feb 2022 – May 2022

- Designed and ran UX research for an augmented-reality app with 125+ interviewees, and built a multiplayer prototype (Unity, Photon, C#)

EDUCATION

Double MSc in Computer Science and Engineering (EIT Digital) Sep 2020 – Oct 2022

Politecnico di Milano (IT) & Technische Universität Berlin (DE)

Major in Human-Computer Interaction and Design, Minor in Innovation and Entrepreneurship. Final grades: 110/110 cum laude (Milan), 1.0 (Berlin). Thesis: UX research on augmented reality

BSc in Engineering of Computing Systems Sep 2017 – Sep 2020

Politecnico di Milano (IT)

SKILLS & CERTIFICATIONS

Programming: Java, JavaScript, TypeScript, SQL, C#

Cloud & Tools: Spring Boot, React, Apollo GraphQL, REST / OpenAPI, Cypress, Docker, GitLab CI/CD, AWS (S3, SQS, ECS, RDS), Terraform, Prometheus, Grafana, Git

Product: Product ownership, UX research, User interviews, Usability testing, Prototyping, Figma, Agile / Scrum, Product management, Requirements engineering, Stakeholder management, Backlog prioritization, User story mapping, Design thinking, UEQ, Personas, Kanban, Product analytics (SQL, Grafana), Workshop facilitation

AI: AI-assisted engineering (Claude Code), Prompt engineering, LLM product features, AI agent design, MCP

Certifications: Professional Scrum Product Owner (PSPO I), 2025; Google Project Management Certificate, 2023; Generative AI Essentials (EIT Digital), 2023

Languages: English (C1, IELTS), Italian (native), Spanish (B1), German (B1)
